Alicia Pan

alicia.pan@uwaterloo.ca aliciajpan.github.io panalicia

Hardware: STM32, Arduino, DMM, oscilloscope, signal generator, soldering, FPGA prototyping
PCBs & Design: DipTrace, KiCAD, LTspice, TinkerCAD, SolidWorks, AutoCAD, GD&T
Coding & Tools: C/C++, MATLAB, Python, Java, Eclipse, Keil µVision, STM32CubeIDE, Git, BitBucket, JIRA (Agile)

Experience

Electrical Engineering Co-op | Hyivy Health | Kitchener, ON | *Jan 2023 - Present*

Embedded Systems Developer | onsemi (ON Semiconductor) | Waterloo, ON | *May – Aug 2022*

- Implemented firmware updates for a low-power Bluetooth-enabled SoC designed for wearable health tech applications
- Used **oscilloscope**, **J-Link debugger**, and **FPGA prototyping** kit to test bug fixes for clock, memory, and voltage trim functions
- Created detailed documentation for code change decisions and technical reference material for future new hires

Hardware & Embedded Systems Intern | CleanSlateUV | Toronto, ON | *Sept - Dec 2021*

- Led a **photodiode sensor** project to design a UV-C light dosage testing device and signal processing circuit
- Characterized sensors with an **oscilloscope** to compare options for a device that saves and displays readings
- Worked with **I2C** and **UART** communication in **STM32CubeIDE** using **FreeRTOS (C)** for ARM Cortex-M3 core

Robotics Team Lead | Team 6070 Gryphon Machine | Mississauga, ON | Sept *2016 - Apr 2019*

- Worked with solenoids, double-acting cylinders, **encoders,** and **motor controllers** to build industrial-sized robots
- **Coordinated 20+ people** to collect data and develop successful match strategies
- Led a drive team of 5 people during high-pressure playoffs to win **1st place** in several district competitions

Projects

Autonomous Search & Rescue Robot | STM32 Nucleo, Adafruit TOFs, PID Control | *2022*

- Designed and built an autonomous robot that navigates an obstacle course using **TOF proximity sensors**
- Acted as electrical lead to select components, manage battery and wiring, and test sensors
- Acted as **project manager** to schedule tasks, facilitate check-ins, and ensure that requirements were met

555 Timer LED Flasher PCB | DipTrace, LTspice, SnapEDA, TinkerCAD | *2021*

- Created a block diagram, circuit schematic, and simulation to capture **NE 555 IC** behaviour
- **Analyzed datasheets** to select compatible and cost-effective components
- Iterated through several PCB layouts and routing options from design review feedback

Modeling & Analysis Course Projects | MATLAB, C++ | *2021*

- Created MATLAB model of 3D heat equation for thermodynamic analysis
- Used C++ to process raw ISS data for use in a MATLAB spacecraft simulation to analyze velocity and positioning
- Used MATLAB's **Control System Toolbox** to create bode plots for a low-pass filter

Education

University of Waterloo – Mechatronics Engineering, Class of 2024
Class Representative *(2019 – 2022)* & Engineering Ambassador *(40+ speed mentoring sessions with high school students)*
Working toward ***Certified Associate in Project Management (CAPM)*** certification

Awards

1st Place Designathon | 2021
UW Medical & Biological Engineering Student Society
Norman Esch Student Entrepreneurship Award | 2020

Interests

Volleyball Competitively trained but not vertically gifted
Violin Played for the Mississauga Symphony Youth Orchestra
Rubik's Cube 52 seconds is my current solving time record
